. . . Q: Why is my collection not getting saved after I add items with form/mongoose/mongoose-express? I am new to this mongoose/express/node.js/front end dev world and feel like I am missing something big here. I am using mongodb, express, mongoose and mongoose-express for the backend and express js for the frontend. I have a collection of articles. When a user submits a form to add an article to the collection, the following code is called: app.post('/add', function(req, res) { var article = new Article({ title: req.body.title, description: req.body.description, link: req.body.link, timestamp: req.body.timestamp }); article.save(function(err, article) { if (err) { res.send(err); } else { res.redirect("/"); } }); }); As you can see, I am attempting to save the submitted article to the collection of articles. Here is the schema definition for the collection: var Article = new Schema({ title: String, description: String, link: String, timestamp: Date, votes: { type: Number }, comments: [{
